MOBILE TECHNOLOGIES AND PROGRAMMING – Erasmus - Mobile Web Applications

1. Responses to the specified tasks should be consolidated into a single PDF document and submitted via the Moodle platform at https://delta.pk.edu.pl. Subsequent to the submission, the teacher will conduct a review of the document. It is imperative to be prepared for a potential request from the teacher to exhibit the operational functionality of the solution provided.

2. **Media queries.**

   Within the document accompanying these instructions, two media queries are already established. Please incorporate two additional media queries and configure the styles to ensure that the webpage is rendered as depicted in the figures below on devices with screen widths of 800 px or less and 500 px or less, respectively:

   Width ≤ 800px:

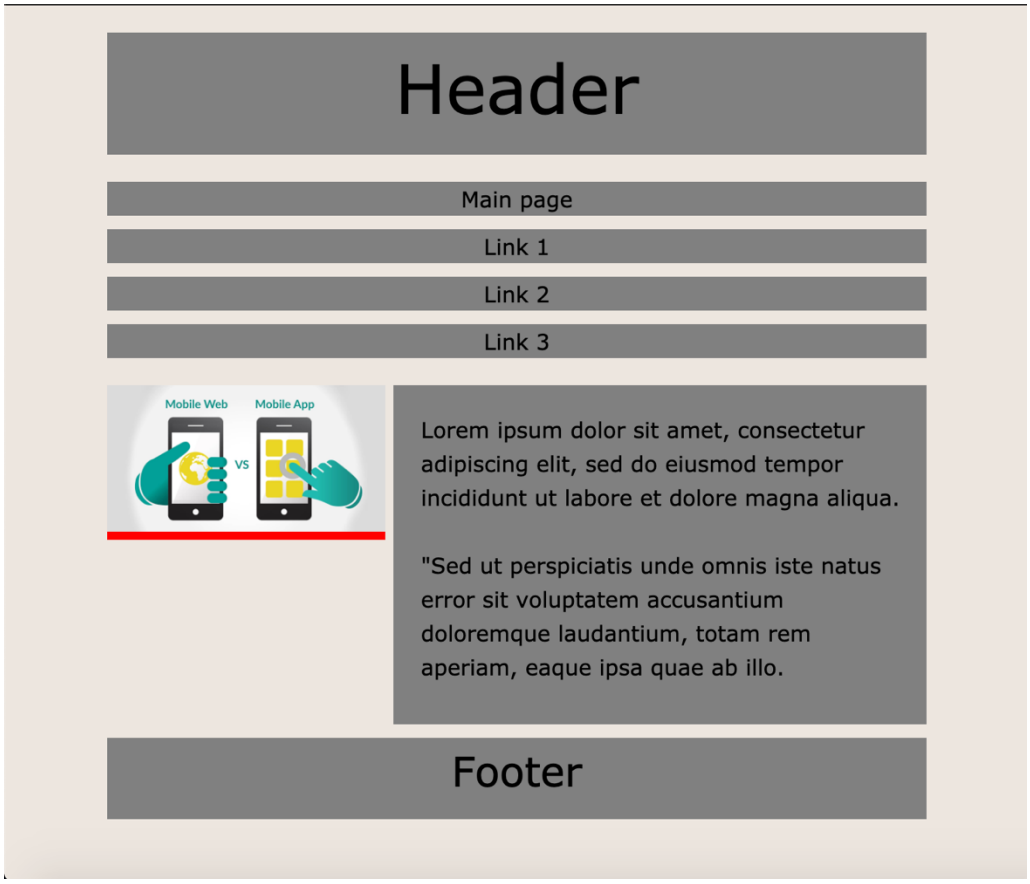

Fig. 1

   Width ≤ 500px:

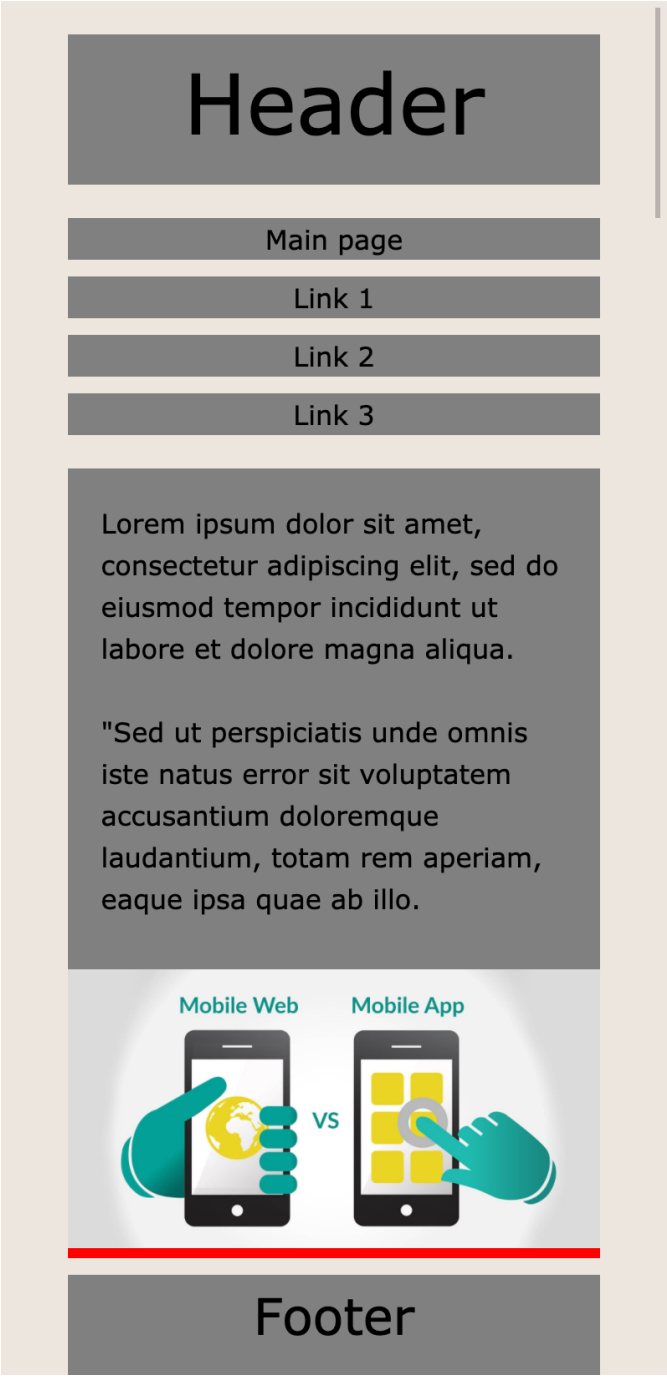

Fig. 2

In response to the task, please provide the contents of the `responsive.css` file. It is not necessary to attach any additional files.

3. **Bootstrap.**

Construct a gallery utilizing the Bootstrap Framework. The document linked to these instructions includes images within div elements. To ensure the gallery adapts responsively, assign suitable Bootstrap classes to the divs. This adjustment will ensure the gallery aligns with the designs illustrated in the provided figures:

Width ≥ 1200px:

Fig. 3

Width ≥ 992px:

Fig. 4

Width ≥ 768px:

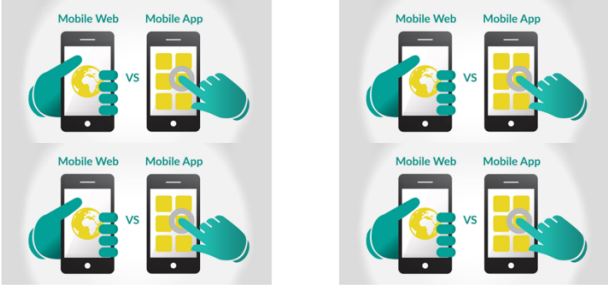

Fig. 5

Width < 768px:

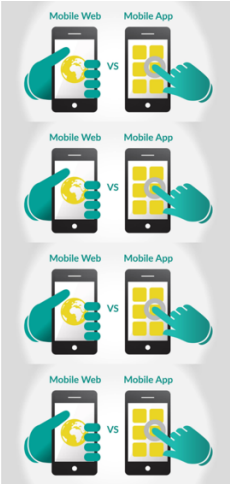

Fig. 6

In response to the task, please provide the contents of the `index.html` file. It is not necessary to attach any additional files.
